1. Apa itu Modul Pengadaan? / What is the Procurement Module?

Modul **Pengadaan** di KEA One mengelola seluruh siklus pembelian barang dan jasa dari perusahaan Anda ke supplier (vendor), mulai dari:

- **Perencanaan** — rencana belanja, forecast, auto-reorder
- **Sourcing** — minta penawaran (RFQ), banding harga, kontrak supplier
- **Permintaan & pesanan** — PR → PO
- **Penerimaan** — barang masuk gudang (GR) atau biaya/aset
- **Kuangan** — tagihan supplier, matching, pembayaran, PPh, jurnal
- **Kontrol** — approval, budget, audit, laporan

Modul ini dirancang fleksibel: perusahaan kecil bisa pakai mode sederhana (penerimaan langsung), sementara perusahaan menengah-besar bisa aktifkan PR → PO → GR, AP, budget, dan approval matrix.

Dokumen utama yang akan Anda temui

Singkatan	Nama lengkap	Fungsi singkat
PR	Purchase Requisition	Permintaan pembelian internal
PO	Purchase Order	Pesanan resmi ke supplier
GR	Goods Receipt	Bukti penerimaan barang
PRN	Purchase Return	Retur barang ke supplier
RFQ	Request for Quotation	Permintaan penawaran harga
AP	Accounts Payable	Tagihan/hutang ke supplier

English

The **Procurement** module in KEA One manages the entire cycle of purchasing goods and services from your company to suppliers (vendors), starting from:

- **Planning** — purchase plans, forecasts, auto-reorder
- **Sourcing** — request for quotation (RFQ), price comparison, supplier contracts
- **Requisition & orders** — PR → PO
- **Receiving** — goods into warehouse (GR) or expense/asset
- **Finance** — vendor invoices, matching, payments, withholding tax, journals
- **Control** — approval, budget, audit, reports

This module is designed to be flexible: small companies can use a simple mode (direct receipt), while medium-to-large companies can enable PR → PO → GR, AP, budget, and approval matrix.

Main documents you will encounter

Abbreviation	Full name	Brief function
PR	Purchase Requisition	Internal purchase request
PO	Purchase Order	Official order to supplier
GR	Goods Receipt	Proof of goods received
PRN	Purchase Return	Return of goods to supplier
RFQ	Request for Quotation	Request for price quotation
AP	Accounts Payable	Vendor invoice/payables

2. Persiapan Sebelum Mulai / Preparation Before You Start

Bahasa Indonesia

2.1 Aktifkan modul Pengadaan

Modul Pengadaan **tidak aktif secara default** untuk setiap tenant/perusahaan.

Admin sistem / super admin harus:

1. Buka **Pengaturan Perusahaan** → modul aplikasi
2. Aktifkan modul **Pengadaan** (purchase)
3. Pastikan user yang bersangkutan punya **role** dengan menu Pengadaan

Setelah aktif, user akan melihat tile/aplikasi **Pengadaan** di desktop KEA One.

2.2 Master data wajib

Sebelum transaksi pertama, lengkapi data berikut di modul **Master**:

Master	Lokasi	Keterangan
Produk	Master → Produk	Barang yang dibeli; tentukan jenis (stok / procurement / aset tetap)
Supplier	Master → Kontak (tipe Supplier)	Vendor/pemasok
Gudang	Master → Gudang	Lokasi penerimaan stok
Satuan	Master → Satuan	Unit beli (pcs, kg, box, dll.)
Departemen	Master → Departemen	Untuk cost center (jika diaktifkan)
Outlet	Master → Outlet	Cabang/lokasi (opsional)
COA / Akun GL	Master → Chart of Accounts	Wajib jika GL posting diaktifkan
User & Role	Pengaturan → User / Role	Hak akses per menu

2.3 Jenis produk — penting dipahami sejak awal

Saat membuat produk di Master, tentukan **jenis baris pembelian**:

Jenis	Contoh	Perilaku saat GR dikonfirmasi
Inventory (stok)	Bahan baku, barang dagang	Stok gudang bertambah
Procurement / non-inventory	ATK, jasa cleaning	Tidak masuk stok gudang; dicatat sebagai biaya
Fixed asset / aset tetap	Laptop, mesin, furniture	Dibuat kartu aset , bukan stok gudang

Centang di form produk:

- **Item procurement / non-inventory** → untuk barang habis pakai / jasa
- **Item aset tetap** → untuk barang yang perlu dicatat sebagai aset perusahaan

English

2.1 Enable the Procurement module

The Procurement module is **not enabled by default** for every tenant/company.

System admin / super admin must:

1. Open **Company Settings** → application modules
2. Enable the **Procurement** module (purchase)
3. Ensure the relevant users have a **role** with the Procurement menu

Once enabled, users will see the **Procurement** tile/application on the KEA One desktop.

2.2 Required master data

Before the first transaction, complete the following data in the **Master** module:

Master	Location	Notes
Products	Master → Products	Items to purchase; set type (stock / procurement / fixed asset)
Suppliers	Master → Contacts (Supplier type)	Vendors/suppliers
Warehouses	Master → Warehouses	Stock receiving locations
Units	Master → Units	Purchase units (pcs, kg, box, etc.)
Departments	Master → Departments	For cost centers (if enabled)
Outlets	Master → Outlets	Branches/locations (optional)
COA / GL Accounts	Master → Chart of Accounts	Required if GL posting is enabled
Users & Roles	Settings → Users / Roles	Menu access permissions per user

2.3 Product types — important to understand from the start

When creating a product in Master, set the **purchase line type**:

Type	Example	Behavior when GR is confirmed
Inventory (stock)	Raw materials, merchandise	Warehouse stock increases
Procurement / non-inventory	Office supplies, cleaning services	Does not enter warehouse stock; recorded as expense
Fixed asset	Laptop, machine, furniture	Creates an asset card , not warehouse stock

Check the following on the product form:

- **Procurement / non-inventory item** → for consumables / services
- **Fixed asset item** → for items that must be recorded as company assets

3. Struktur Menu & Hak Akses / Menu Structure & Access Rights

Bahasa Indonesia

Setelah masuk aplikasi **Pengadaan**, sidebar dibagi menjadi grup berikut. **Menu yang tampil bergantung pada pengaturan perusahaan dan hak role user.**

Grup Overview (Ikhtisar)

Menu	Fungsi
Dashboard	Ringkasan antrian, spend bulan ini, alert
Reports	Laporan analitik (spend, aging, budget, dll.)

Grup Sourcing

Menu	Fungsi	Syarat tampil
RFQ	Request for Quotation	Setting RFQ aktif
Vendor Price List	Daftar harga kontrak supplier	Setting price list aktif
Contracts	Blanket PO / kontrak tahunan	Setting kontrak aktif

Grup Planning (Perencanaan)

Menu	Fungsi	Syarat tampil
Procurement Plan	Rencana belanja tahunan per dept	Setting annual plan aktif

Grup Operations (Operasional)

Menu	Fungsi	Syarat tampil
Purchase Requisition	PR	Flow = Strict PR→PO→GR
Purchase Order	PO	Flow = PO→GR atau Strict
Goods Receipt	GR dari PO	Flow = PO→GR atau Strict
Direct Receipt	Penerimaan langsung tanpa PO	Flow = Direct
Purchase Return	Retur ke supplier	Setting retur aktif
Debit/Credit Note	Koreksi harga/qty setelah GR	Setting adjustment aktif
Delivery Schedule	Jadwal kirim per PO	Setting delivery aktif + flow PO

Grup AP (Accounts Payable)

Menu	Fungsi
Vendor Invoice	Tagihan supplier
Match Exceptions	Selisih PO↔GR↔Invoice
Payment Batch	Batch pembayaran hutang
Prepayment	Uang muka ke supplier
Withholding Tax	Aturan & rekap PPh

Grup Finance

Menu	Fungsi
GL Journals	Jurnal otomatis dari procurement
Budget	Anggaran & komitmen
Fixed Assets	Kartu aset dari pembelian

Grup Settings

Menu	Fungsi
------	--------

Approval Matrix	Aturan approver otomatis by amount/dept
Approval Delegation	Pengganti approver saat cuti
Settings	Semua toggle fitur procurement

Aplikasi Approval terpisah

Selain menu di Pengadaan, user approver juga bisa buka aplikasi **Approvals** di desktop untuk inbox persetujuan PR, PO, retur, invoice, dll.

English

After opening the **Procurement** application, the sidebar is divided into the following groups. **Menus shown depend on company settings and the user's role permissions.**

Overview group

Menu	Function
Dashboard	Summary of queues, spend this month, alerts
Reports	Analytic reports (spend, aging, budget, etc.)

Sourcing group

Menu	Function	Display requirement
RFQ	Request for Quotation	RFQ setting enabled
Vendor Price List	Supplier contract price list	Price list setting enabled
Contracts	Blanket PO / annual contract	Contract setting enabled

Planning group

Menu	Function	Display requirement
Procurement Plan	Annual purchase plan per department	Annual plan setting enabled

Operations group

Menu	Function	Display requirement
Purchase Requisition	PR	Flow = Strict PR→PO→GR
Purchase Order	PO	Flow = PO→GR or Strict
Goods Receipt	GR from PO	Flow = PO→GR or Strict
Direct Receipt	Direct receipt without PO	Flow = Direct
Purchase Return	Return to supplier	Return setting enabled
Debit/Credit Note	Price/qty correction after GR	Adjustment setting enabled
Delivery Schedule	Delivery schedule per PO	Delivery setting enabled + PO flow

AP (Accounts Payable) group

Menu	Function
------	----------

Vendor Invoice	Vendor invoice
Match Exceptions	PO↔GR↔Invoice discrepancies
Payment Batch	Payables payment batch
Prepayment	Advance payment to supplier
Withholding Tax	Withholding tax rules & summary

Finance group

Menu	Function
GL Journals	Automatic journals from procurement
Budget	Budget & commitments
Fixed Assets	Asset cards from purchases

Settings group

Menu	Function
Approval Matrix	Automatic approver rules by amount/department
Approval Delegation	Substitute approver while on leave
Settings	All procurement feature toggles

Separate Approvals application

In addition to menus in Procurement, approver users can also open the **Approvals** application on the desktop for an inbox of PR, PO, return, invoice, and other approvals.

4. Pengaturan Modul (Settings) / Module Settings (Settings)

Bahasa Indonesia

Buka **Pengadaan** → **Settings**. Hanya user dengan hak `purchasesettings` (biasanya admin/manager) yang bisa mengubah.

4.1 Alur pembelian (Purchase Flow)

Opsi	Arti	Menu yang muncul
Direct	Langsung terima barang tanpa PR/PO	Direct Receipt saja
PO → GR	Buat PO dulu, lalu terima barang	PO + GR
Strict PR → PO → GR	Wajib PR disetujui dulu, baru PO, baru GR	PR + PO + GR

Rekomendasi:

- Toko/resto kecil → **Direct**
- Perusahaan dengan kontrol purchasing → **PO → GR**
- Perusahaan dengan kontrol dept + approval ketat → **Strict PR → PO → GR**

4.2 Approval

Setting	Default	Keterangan
PR wajib approval	Off	PR harus disetujui sebelum jadi PO
PO wajib approval	Off	PO harus disetujui sebelum di-order ke supplier
Retur wajib approval	Off	Retur perlu persetujuan
Invoice wajib approval	Off	Tagihan supplier perlu approval
Payment batch wajib approval	Off	Batch bayar perlu approval
Prepayment wajib approval	Off	Uang muka perlu approval
Mode approval	Manual	<code>manual</code> = pilih approver saat submit; <code>matrix</code> = otomatis dari Approval Matrix
Parallel approval	Off	Beberapa approver satu level (semua harus setuju)
Delegation	Off	Izinkan pengganti approver
Escalation / SLA	Off	Auto-eskalasi jika pending > X hari
SLA hari	3	Batas hari sebelum eskalasi
SoD: creator ≠ approver	On	Pembuat dokumen tidak boleh approve sendiri
SoD: approver ≠ receiver	Off	Approver tidak boleh konfirmasi GR
Field audit	On	Catat history perubahan qty/harga

4.3 Fitur operasional

Setting	Default	Keterangan
Update harga pokok saat GR	On	<code>cost_price</code> produk diupdate dari GR
Auto-close PO saat full receive	On	PO otomatis <code>received</code> jika semua qty diterima
Retur pembelian	On	Aktifkan menu Purchase Return
GR reversal (void)	Off	Batalan GR yang sudah confirmed
Debit/Credit note	On	Koreksi setelah GR
Delivery schedule	On	Jadwal kirim per PO
Lampiran dokumen	On	Upload quotation, foto, PDF
Cost center / dept	On	Field departemen di PR/PO

4.4 Fitur keuangan (Finance)

Setting	Default	Keterangan
Vendor invoice (AP)	Off	Aktifkan hutang supplier
3-way match	Off	Cocokkan PO ↔ GR ↔ Invoice
2-way match	Off	Cocokkan PO ↔ Invoice (jasa/non-stock)
Toleransi qty match (%)	0	Selisih qty yang masih diterima
Toleransi harga match (%)	0	Selisih harga yang masih diterima

Payment batch	Off	Batch pembayaran supplier
Prepayment	Off	Uang muka supplier
Withholding tax (PPH)	Off	Potong PPh 23/22/4(2)
GL posting otomatis	Off	Buat jurnal saat GR/invoice/payment
Budget check	Off	Cek anggaran saat submit PR/PO

4.5 Fitur sourcing & perencanaan

Setting	Default	Keterangan
RFQ	Off	Request for Quotation
Vendor price list	Off	Harga kontrak per supplier×produk
Contract / Blanket PO	Off	Kontrak tahunan
Auto-reorder	Off	Generate PR draft dari reorder point
Demand planning	Off	Forecast → suggested PR
Annual procurement plan	Off	Rencana beli per dept/tahun
Landed cost	Off	Freight/customs dialokasikan ke item GR

4.6 Mapping akun GL

Jika GL posting aktif, isi akun COA untuk:

- Persediaan (inventory)
- GRNI (Goods Received Not Invoiced)
- Hutang usaha (AP)
- PPN Masukan
- Kas / Bank
- Hutang PPh
- Beban langsung (expense)
- Aset tetap

English

Open **Procurement** → **Settings**. Only users with the `purchasesettings` permission (usually admin/manager) can make changes.

4.1 Purchase flow

Option	Meaning	Menus that appear
Direct	Receive goods directly without PR/PO	Direct Receipt only
PO → GR	Create PO first, then receive goods	PO + GR
Strict PR → PO → GR	PR must be approved first, then PO, then GR	PR + PO + GR

Recommendation:

- *Small shop/restaurant* → **Direct**
- *Company with purchasing control* → **PO → GR**
- *Company with department control + strict approval* → **Strict PR → PO → GR**

4.2 Approval

Setting	Default	Notes
PR requires approval	Off	PR must be approved before becoming PO
PO requires approval	Off	PO must be approved before ordering to supplier
Return requires approval	Off	Return needs approval
Invoice requires approval	Off	Vendor invoice needs approval
Payment batch requires approval	Off	Payment batch needs approval
Prepayment requires approval	Off	Prepayment needs approval
Approval mode	Manual	<code>manual</code> = select approver on submit; <code>matrix</code> = automatic from Approval Matrix
Parallel approval	Off	Multiple approvers at one level (all must agree)
Delegation	Off	Allow substitute approver
Escalation / SLA	Off	Auto-escalate if pending > X days
SLA days	3	Day limit before escalation
SoD: creator ≠ approver	On	Document creator cannot approve their own document
SoD: approver ≠ receiver	Off	Approver cannot confirm GR
Field audit	On	Record history of qty/price changes

4.3 Operational features

Setting	Default	Notes
Update cost price on GR	On	Product <code>cost_price</code> updated from GR
Auto-close PO on full receive	On	PO automatically becomes <code>received</code> if all qty received
Purchase return	On	Enable Purchase Return menu
GR reversal (void)	Off	Cancel confirmed GR
Debit/Credit note	On	Correction after GR
Delivery schedule	On	Delivery schedule per PO
Document attachments	On	Upload quotation, photo, PDF
Cost center / department	On	Department field on PR/PO

4.4 Finance features

Setting	Default	Notes
Vendor invoice (AP)	Off	Enable vendor payables
3-way match	Off	Match PO ↔ GR ↔ Invoice
2-way match	Off	Match PO ↔ Invoice (services/non-stock)

Qty match tolerance (%)	0	Qty variance still accepted
Price match tolerance (%)	0	Price variance still accepted
Payment batch	Off	Supplier payment batch
Prepayment	Off	Supplier prepayment
Withholding tax (PPH)	Off	Withhold PPh 23/22/4(2)
Automatic GL posting	Off	Create journal on GR/invoice/payment
Budget check	Off	Check budget on PR/PO submit

4.5 Sourcing & planning features

Setting	Default	Notes
RFQ	Off	Request for Quotation
Vendor price list	Off	Contract price per supplier×product
Contract / Blanket PO	Off	Annual contract
Auto-reorder	Off	Generate PR draft from reorder point
Demand planning	Off	Forecast → suggested PR
Annual procurement plan	Off	Purchase plan per dept/year
Landed cost	Off	Freight/customs allocated to GR items

4.6 GL account mapping

If GL posting is active, fill in COA accounts for:

- Inventory
- GRNI (Goods Received Not Invoiced)
- Accounts payable (AP)
- Input VAT (PPN Masukan)
- Cash / Bank
- Withholding tax payable
- Direct expense
- Fixed assets

5. Tiga Mode Alur Pembelian / Three Purchase Flow Modes

Bahasa Indonesia

Mode A — Direct (Penerimaan Langsung)

Supplier → Direct Receipt (GR) → Stok / Expense / Aset

Kapan dipakai: Resto, retail kecil, pembelian ad-hoc.

Langkah user:

1. Buka **Direct Receipt**
2. Pilih supplier (wajib)
3. Tambah baris produk + qty + harga

4. Simpan draft → **Confirm**
5. Stok bertambah (jika produk track stock)

Mode B — PO → GR

PO (draft) → Submit/Approve → Order → GR → Confirm → Stok

Kapan dipakai: Perusahaan yang sudah punya proses PO ke supplier.

Langkah user:

1. Buat **PO** → isi supplier & baris
2. Submit (+ approval jika aktif)
3. Klik **Order** — PO status jadi **ordered**
4. Saat barang datang, buat **GR** dari PO
5. **Confirm** GR → stok masuk

Mode C — Strict PR → PO → GR

PR → Approve → PO (dari PR) → Order → GR → Confirm

Kapan dipakai: Multi-departemen, kontrol budget & approval ketat.

Langkah user:

1. Dept/staff buat **PR**
2. Submit → approver setuju
3. Purchasing buat **PO** dari PR approved (bisa split per supplier)
4. Order PO ke supplier
5. Gudang buat **GR** saat barang tiba
6. Confirm GR

English

Mode A — Direct (Direct Receipt)

Supplier → Direct Receipt (GR) → Stock / Expense / Asset

When to use: Restaurant, small retail, ad-hoc purchases.

User steps:

1. Open **Direct Receipt**
2. Select supplier (required)
3. Add product lines + qty + price
4. Save draft → **Confirm**
5. Stock increases (if product tracks stock)

Mode B — PO → GR

PO (draft) → Submit/Approve → Order → GR → Confirm → Stock

When to use: Companies that already have a PO process with suppliers.

User steps:

1. Create **PO** → fill supplier & lines

- 2. Submit (+ approval if enabled)
- 3. Click **Order** — PO status becomes `ordered`
- 4. When goods arrive, create **GR** from PO
- 5. **Confirm** GR → stock received

Mode C — Strict PR → PO → GR

PR → Approve → PO (from PR) → Order → GR → Confirm

When to use: Multi-department, strict budget & approval control.

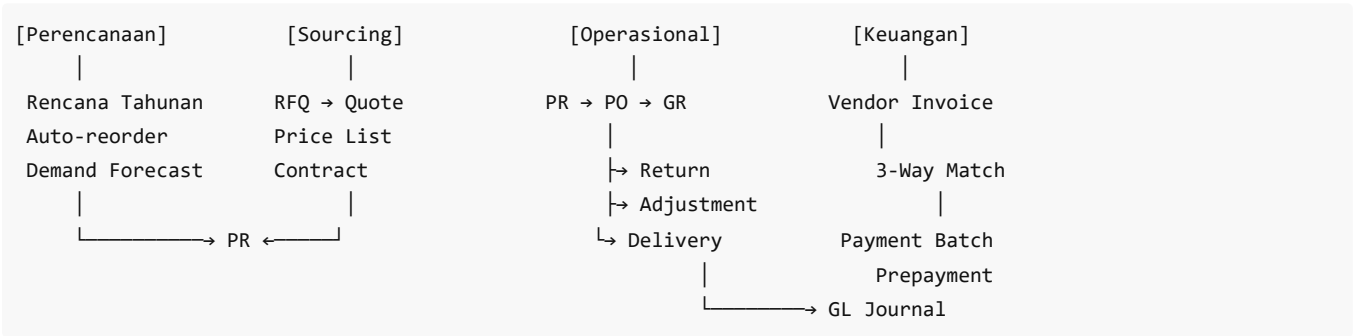

User steps:

- 1. Department/staff create **PR**
- 2. Submit → approver approves
- 3. Purchasing create **PO** from approved PR (can split per supplier)
- 4. Order PO to supplier
- 5. Warehouse create **GR** when goods arrive
- 6. Confirm GR

6. Alur Kerja End-to-End / End-to-End Workflow

Bahasa Indonesia

Diagram lengkap modul Pengadaan (semua fitur aktif):

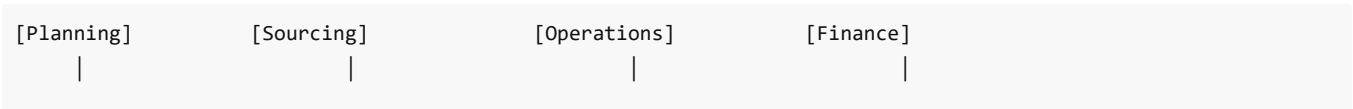

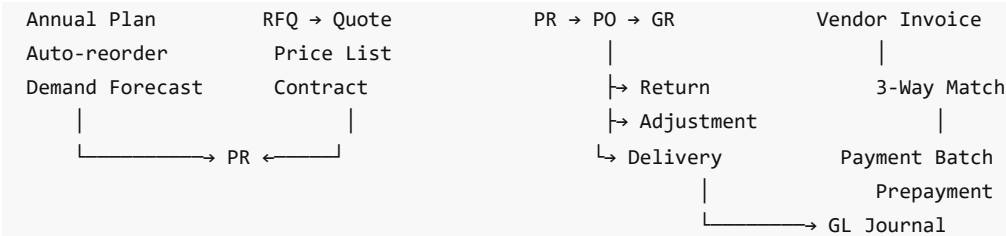

Urutan implementasi yang disarankan untuk perusahaan baru

Tahap	Aktifkan	User yang terlibat
1	Direct atau PO→GR, supplier, produk	Gudang, purchasing
2	PR + approval, retur	Dept head, manager
3	Vendor invoice + 3-way match	AP / finance
4	Payment batch, PPh, GL	Finance
5	RFQ, budget, matrix approval	Manager, director
6	Planning, reports, vendor portal	Strategic procurement

English

Complete Procurement module diagram (all features enabled):

Recommended implementation sequence for a new company

Phase	Enable	Users involved
1	Direct or PO→GR, supplier, product	Warehouse, purchasing
2	PR + approval, return	Department head, manager
3	Vendor invoice + 3-way match	AP / finance
4	Payment batch, withholding tax, GL	Finance
5	RFQ, budget, matrix approval	Manager, director
6	Planning, reports, vendor portal	Strategic procurement

7. Dashboard Pengadaan / Procurement Dashboard

Bahasa Indonesia

Lokasi: Pengadaan → Dashboard

Dashboard menampilkan snapshot operasional:

Kartu ringkasan (contoh)

Metrik	Arti
Spend MTD	Total belanja bulan berjalan (dari GR confirmed)
PR Draft / Submitted	PR menunggu dilanjutkan / disetujui
PO Draft / Submitted / Open	PO dalam proses
PO Overdue	PO sudah ordered tapi belum diterima melewati jadwal
GR Draft	Penerimaan belum dikonfirmasi
Return Submitted	Retur menunggu approval
Invoice Draft / Payable	Tagihan belum/lunas
Match Exception Open	Selisih match belum diselesaikan
Delivery Overdue	Jadwal kirim terlambat

Widget tambahan (jika fitur aktif)

- **Auto-reorder preview** — produk di bawah reorder point
- **Demand forecast** — saran PR dari perencanaan
- **Vendor compliance alerts** — dokumen supplier (SIUP/NPWP) expired

Klik baris **Recent activity** untuk loncat ke dokumen terkait.

English

Location: Procurement → Dashboard

The dashboard displays an operational snapshot:

Summary cards (examples)

Metric	Meaning
Spend MTD	Total spend in the current month (from confirmed GR)
PR Draft / Submitted	PR waiting to proceed / be approved
PO Draft / Submitted / Open	PO in process
PO Overdue	PO already ordered but not yet received past schedule
GR Draft	Receipt not yet confirmed
Return Submitted	Return waiting for approval
Invoice Draft / Payable	Invoice unpaid/outstanding
Match Exception Open	Unresolved match discrepancy
Delivery Overdue	Delivery schedule overdue

Additional widgets (if feature enabled)

- **Auto-reorder preview** — products below reorder point
- **Demand forecast** — suggested PR from planning
- **Vendor compliance alerts** — expired supplier documents (SIUP/NPWP)

Click a **Recent activity** row to jump to the related document.

8. Master Data Pendukung / Supporting Master Data

Bahasa Indonesia

8.1 Supplier (Pemasok)

Lokasi: Master → Kontak → tipe **Supplier**

Isi minimal:

- Nama, telepon, alamat
- NPWP (jika ada)
- Payment term (tempo bayar)
- Tax type (PKP/non-PKP)

Fitur vendor management (jika digunakan):

- **Tier:** Strategic / Preferred / One-time
- **Status onboarding:** Pending / Approved
- **Status vendor:** Active / Suspended / Blacklisted
- **Dokumen legal:** SIUP, NPWP, PKP + tanggal expired
- **Portal token:** Link portal supplier

Supplier yang **suspended** atau **blacklisted** tidak bisa dipilih di PO baru.

8.2 Produk untuk pembelian

Produk muncul di picker PR/PO/RFQ jika:

- Kategori = bahan baku (**raw material**), ATAU
- Centang **Item procurement / non-inventory**, ATAU
- Centang **Item aset tetap**

8.3 Departemen & Cost Center

Jika **Cost center enabled**, field **Departemen** muncul di header PR/PO. Berguna untuk:

- Laporan spend per dept
- Budget check per dept
- Approval matrix per dept

English

8.1 Supplier (Vendor)

Location: Master → Contacts → **Supplier** type

Minimum fields:

- Name, phone, address
- Tax ID / NPWP (if applicable)
- Payment term
- Tax type (PKP/non-PKP)

Vendor management features (if used):

- **Tier:** Strategic / Preferred / One-time
- **Onboarding status:** Pending / Approved
- **Vendor status:** Active / Suspended / Blacklisted
- **Legal documents:** SIUP, NPWP, PKP + expiry date
- **Portal token:** Supplier portal link

*Suppliers that are **suspended** or **blacklisted** cannot be selected on new POs.*

8.2 Products for purchasing

Products appear in the PR/PO/RFQ picker if:

- Category = raw material, OR
- **Procurement / non-inventory item** is checked, OR
- **Fixed asset item** is checked

8.3 Department & Cost Center

If **Cost center enabled**, the **Department** field appears on the PR/PO header. Useful for:

- Spend reports per department
- Budget check per department
- Approval matrix per department

9. Sourcing — RFQ, Price List, Kontrak / Sourcing — RFQ, Price List, Contract

Bahasa Indonesia

9.1 RFQ (Request for Quotation)

Aktifkan dulu: Settings → RFQ enabled

Langkah membuat RFQ:

1. Buka **Pengadaan** → **RFQ**
2. Klik **Buat baru**
3. Isi:
 - Judul / referensi
 - Tanggal deadline quote
 - Baris item (produk, qty, spesifikasi)
 - Supplier yang diajak (multi supplier)
4. Simpan → **Submit** / kirim ke supplier (via share link jika ada)
5. Supplier mengisi **Vendor Quote** (penawaran harga)
6. Buka **Quote Comparison** — banding harga side-by-side
7. Pilih **winner** → buat **PR** atau **PO** dari quote terpilih

Status RFQ tipikal: draft → open → closed / cancelled

9.2 Vendor Price List

Aktifkan dulu: Settings → Vendor price list enabled

Menyimpan **harga kontrak** per kombinasi supplier × produk.

Manfaat:

- Saat buat PO, harga otomatis terisi dari price list
- Kontrol price variance di laporan

Langkah:

1. Buka **Vendor Price List**
 2. Pilih supplier + produk
 3. Isi harga, satuan, periode berlaku (valid from/to)
 4. Simpan
-

9.3 Kontrak / Blanket PO

Aktifkan dulu: Settings → Contract enabled

Untuk pembelian **kontraktual** (misal: kontrak tahunan ATK dengan 1 supplier).

Alur:

1. Buat **Contract** — supplier, nilai kontrak, periode
 2. Tambah baris item / kategori
 3. **Release PO** — buat PO partial dari sisa kontrak per periode
 4. PO released mengurangi **remaining value** kontrak
-

English

9.1 RFQ (Request for Quotation)

Enable first: Settings → RFQ enabled

Steps to create an RFQ:

1. Open **Procurement** → **RFQ**
2. Click **Create new**
3. Fill in:
 - Title / reference
 - Quote deadline date
 - Line items (product, qty, specification)
 - Invited suppliers (multiple suppliers)

4. Save → **Submit** / send to supplier (via share link if available)
5. Supplier fills in **Vendor Quote** (price quotation)
6. Open **Quote Comparison** — compare prices side-by-side
7. Select **winner** → create **PR** or **PO** from selected quote

Typical RFQ status: draft → open → closed / cancelled

9.2 Vendor Price List

Enable first: Settings → Vendor price list enabled

Stores **contract prices** per supplier × product combination.

Benefits:

- When creating PO, price is automatically filled from price list
- Control price variance in reports

Steps:

1. Open **Vendor Price List**
 2. Select supplier + product
 3. Fill in price, unit, valid period (valid from/to)
 4. Save
-

9.3 Contract / Blanket PO

Enable first: Settings → Contract enabled

For **contractual** purchases (e.g., annual office supplies contract with one supplier).

Flow:

1. Create **Contract** — supplier, contract value, period
 2. Add line items / categories
 3. **Release PO** — create partial PO from remaining contract per period
 4. Released PO reduces contract **remaining value**
-

10. Perencanaan — Rencana Tahunan & Demand Planning / Planning — Annual Plan & Demand Planning

Bahasa Indonesia

10.1 Rencana Pengadaan Tahunan (Annual Plan)

Aktifkan: Settings → Annual procurement plan

1. Buka **Procurement Plan**
2. Buat rencana per **tahun** dan **departemen**
3. Isi baris: produk/kategori, qty estimasi, budget estimasi
4. Status: draft → approved → active
5. Saat buat PR, bisa refer ke baris rencana (jika diimplementasi di form)

10.2 Auto-reorder

Aktifkan: Settings → Auto-reorder

- Sistem cek produk dengan stok $\leq$ **reorder point**
- Dashboard menampilkan preview
- Bisa generate **PR draft** otomatis

10.3 Demand Planning / Forecast

Aktifkan: Settings → Demand planning

- Input forecast qty per produk × gudang × periode
 - Sistem suggest kebutuhan pembelian
 - Purchasing review → buat PR
-

English

10.1 Annual Procurement Plan

Enable: Settings → Annual procurement plan

1. Open **Procurement Plan**
2. Create plan per **year** and **department**
3. Fill lines: product/category, estimated qty, estimated budget
4. Status: **draft** → **approved** → **active**
5. When creating PR, you can reference plan lines (if implemented in the form)

10.2 Auto-reorder

Enable: Settings → Auto-reorder

- System checks products with stock ≤ **reorder point**
- Dashboard shows preview
- Can generate **PR draft** automatically

10.3 Demand Planning / Forecast

Enable: Settings → Demand planning

- Input forecast qty per product × warehouse × period
 - System suggests purchase requirements
 - Purchasing reviews → create PR
-

11. Purchase Requisition (PR) / Purchase Requisition (PR)

Bahasa Indonesia

Menu: Pengadaan → Purchase Requisition

Hanya tampil jika flow = Strict PR → PO → GR

11.1 Kapan membuat PR?

- Dept butuh barang/jasa, belum tentu supplier
- Butuh approval manager sebelum purchasing order
- Budget check sebelum komitmen

11.2 Langkah membuat PR

1. Klik + **Buat PR**
2. Isi header:
 - **Outlet** (opsional)
 - **Departemen** (jika cost center aktif)
 - **Catatan** / keperluan
3. Tambah **baris item**:
 - Produk
 - Qty + satuan
 - Estimasi harga (opsional)
 - Catatan per baris

4. **Lampiran** (opsional) — quotation, spec
5. Jika approval aktif:
 - Mode **manual**: pilih approver (urutan = level 1, 2, 3...)
 - Mode **matrix**: approver otomatis
6. Simpan **Draft**

11.3 Status PR

Status	Arti	Aksi tersedia
draft	Masih diedit	Submit, Cancel
submitted	Menunggu approval	Approve, Reject (approver)
approved	Disetujui	Bisa dibuat PO
rejected	Ditolak	Edit & submit ulang
cancelled	Dibatalkan	—

11.4 Aturan approval PR

- Approver **boleh mengurangi qty** atau **menghapus baris**
- Approver **tidak boleh menaikkan qty**
- Jika **budget check** aktif, submit gagal jika melebihi anggaran dept

11.5 Setelah PR approved

1. Buka **Approved PR** → **PO Board** (atau dari detail PR)
2. Pilih baris PR yang akan di-PO
3. Tentukan **supplier per baris** (bisa beda supplier → split jadi beberapa PO)
4. Sistem buat **PO draft** otomatis

11.6 Share PR

- **PDF** — download / print
- **WhatsApp** — kirim link
- **Public link** — supplier/internal tanpa login (read-only)

English

Menu: Procurement → Purchase Requisition

Only shown if flow = Strict PR → PO → GR

11.1 When to create a PR?

- Department needs goods/services, supplier not yet determined
- Manager approval required before purchasing orders
- Budget check before commitment

11.2 Steps to create a PR

1. Click + **Create PR**
2. Fill header:
 - **Outlet** (optional)
 - **Department** (if cost center enabled)
 - **Notes** / purpose
3. Add **line items**:
 - Product
 - Qty + unit
 - Estimated price (optional)

- Notes per line

4. **Attachments** (optional) — quotation, spec

5. If approval enabled:

- **Manual** mode: select approver (order = level 1, 2, 3...)
- **Matrix** mode: approver automatic

6. Save **Draft**

11.3 PR status

Status	Meaning	Available actions
draft	Still being edited	Submit, Cancel
submitted	Waiting for approval	Approve, Reject (approver)
approved	Approved	Can create PO
rejected	Rejected	Edit & resubmit
cancelled	Cancelled	—

11.4 PR approval rules

- Approver **may reduce qty** or **delete lines**
- Approver **may not increase qty**
- If **budget check** is enabled, submit fails if it exceeds department budget

11.5 After PR is approved

1. Open **Approved PR** → **PO Board** (or from PR detail)
2. Select PR lines to convert to PO
3. Set **supplier per line** (different suppliers → split into multiple POs)
4. System creates **PO draft** automatically

11.6 Share PR

- **PDF** — download / print
- **WhatsApp** — send link
- **Public link** — supplier/internal without login (read-only)

12. Purchase Order (PO) / Purchase Order (PO)

Bahasa Indonesia

Menu: Pengadaan → Purchase Order

12.1 Cara membuat PO

Cara	Keterangan
Manual	Buat PO baru, pilih supplier, isi baris
Dari PR approved	Board PR → PO, auto-split per supplier
Dari RFQ winner	Quote terpilih → PO
Dari Contract release	Release PO dari kontrak
Dari Price list	Harga terisi otomatis

12.2 Langkah membuat PO manual

1. Klik + **Buat PO**
2. Pilih **Supplier** (wajib)
3. Isi header: outlet, dept, expected date, catatan
4. Tambah baris: produk, qty, harga, diskon, satuan
5. Tax & payment term **snapshot** dari supplier
6. Lampiran (quotation PDF)
7. Jadwal delivery (jika aktif) — per baris atau per PO
8. Pilih approver (jika manual approval)
9. Simpan draft

12.3 Status PO

Status	Arti	Aksi
draft	Draft	Submit / Order / Cancel
submitted	Menunggu approval	Approve / Reject
approved	Disetujui	Order ke supplier
ordered	Sudah dikirim ke supplier	Buat GR, Close, Cancel
partial	Sebagian sudah diterima	Buat GR sisa, Close
received	Semua qty diterima	—
rejected	Ditolak	—
cancelled	Dibatalkan	—

12.4 Tombol penting

Tombol	Fungsi
Submit	Kirim untuk approval
Approve / Reject	Keputusan approver
Order	Tandai PO sudah dikirim ke supplier
Close	Tutup PO partial — stop penerimaan sisa
Cancel	Batalkan PO

12.5 Partial receiving

- Setiap GR menambah `qty_received` per baris PO
- PO status otomatis `partial` jika belum full
- Jika **auto-close on full receive** aktif → PO jadi `received` saat qty penuh

12.6 Share PO ke supplier

- PDF, WhatsApp, public link
- Supplier bisa lihat detail PO via link
- Jika **vendor portal** aktif, supplier login via token untuk konfirmasi & upload invoice

English

Menu: Procurement → Purchase Order

12.1 How to create a PO

Method	Notes
Manual	Create new PO, select supplier, fill lines
From approved PR	PR Board → PO, auto-split per supplier
From RFQ winner	Selected quote → PO
From Contract release	Release PO from contract
From Price list	Price filled automatically

12.2 Steps to create a manual PO

1. Click + **Create PO**
2. Select **Supplier** (required)
3. Fill header: outlet, department, expected date, notes
4. Add lines: product, qty, price, discount, unit
5. Tax & payment term **snapshot** from supplier
6. Attachments (quotation PDF)
7. Delivery schedule (if enabled) — per line or per PO
8. Select approver (if manual approval)
9. Save draft

12.3 PO status

Status	Meaning	Actions
draft	Draft	Submit / Order / Cancel
submitted	Waiting for approval	Approve / Reject
approved	Approved	Order to supplier
ordered	Already sent to supplier	Create GR, Close, Cancel
partial	Partially received	Create remaining GR, Close
received	All qty received	—
rejected	Rejected	—
cancelled	Cancelled	—

12.4 Important buttons

Button	Function
Submit	Send for approval
Approve / Reject	Approver decision
Order	Mark PO as sent to supplier
Close	Close partial PO — stop remaining receipt
Cancel	Cancel PO

12.5 Partial receiving

- Each GR adds `qty_received` per PO line
- PO status automatically becomes `partial` if not fully received
- If **auto-close on full receive** is enabled → PO becomes `received` when qty is complete

12.6 Share PO with supplier

- PDF, WhatsApp, public link
- Supplier can view PO detail via link
- If **vendor portal** is enabled, supplier logs in via token to confirm & upload invoice

13. Goods Receipt (GR) & Penerimaan Langsung / Goods Receipt (GR) & Direct Receipt

Bahasa Indonesia

13.1 GR dari PO

Menu: Pengadaan → Goods Receipt

1. Klik + **Buat GR** atau **GR dari PO**
2. Pilih PO berstatus `ordered` atau `partial`
3. Baris PO muncul — isi **qty diterima** (boleh partial)
4. Pilih **gudang** tujuan
5. Scan barcode (jika pakai scanner)
6. **Landed cost** (jika aktif) — tambah freight/customs, dialokasikan ke baris
7. Simpan draft → **Confirm**

Saat Confirm:

- Stok gudang **+qty** (jika produk track stock)
- `cost_price` produk diupdate (jika setting aktif)
- PO `qty_received` terupdate
- Produk **procurement item** → tidak masuk stok, catat expense
- Produk **fixed asset** → buat kartu aset
- GL journal (jika GL posting aktif)
- Trigger 3-way match (jika AP aktif)

13.2 Direct Receipt

Menu: Pengadaan → Direct Receipt (flow = Direct)

Sama seperti GR tapi **tanpa PO**:

- Supplier wajib dipilih
- Langsung confirm → stok/expense/aset

13.3 Status GR

Status	Arti
draft	Belum final
confirmed	Penerimaan final, stok terupdate
cancelled	Dibatalkan saat masih draft

13.4 GR Reversal (Void)

Aktifkan: Settings → GR reversal enabled

- Batalkan GR yang sudah **confirmed**
- Stok di-rollback

- PO `qty_received` dikurangi
- Hati-hati: gunakan hanya jika benar-benar salah input

English

13.1 GR from PO

Menu: Procurement → Goods Receipt

1. Click + **Create GR** or **GR from PO**
2. Select PO with status `ordered` or `partial`
3. PO lines appear — fill in **qty received** (partial allowed)
4. Select destination **warehouse**
5. Scan barcode (if using scanner)
6. **Landed cost** (if enabled) — add freight/customs, allocated to lines
7. Save draft → **Confirm**

On Confirm:

- Warehouse stock **+qty** (if product tracks stock)
- Product `cost_price` updated (if setting enabled)
- PO `qty_received` updated
- **Procurement item** product → does not enter stock, records expense
- **Fixed asset** product → creates asset card
- GL journal (if GL posting enabled)
- Triggers 3-way match (if AP enabled)

13.2 Direct Receipt

Menu: Procurement → Direct Receipt (flow = Direct)

Same as GR but **without PO**:

- Supplier must be selected
- Confirm directly → stock/expense/asset

13.3 GR status

Status	Meaning
<code>draft</code>	Not yet final
<code>confirmed</code>	Final receipt, stock updated
<code>cancelled</code>	Cancelled while still draft

13.4 GR Reversal (Void)

Enable: Settings → GR reversal enabled

- Cancel GR that is already **confirmed**
- Stock is rolled back
- PO `qty_received` is reduced
- Caution: use only if input was truly incorrect

14. Retur Pembelian (Purchase Return) / Purchase Return

Bahasa Indonesia

Menu: Pengadaan → Purchase Return

Aktifkan: Settings → Return enabled

Kapan dipakai?

- Barang rusak / salah kirim
- Return ke supplier setelah GR

Langkah

1. Buat **Purchase Return**
2. Referensi **GR confirmed** atau **PO**
3. Pilih baris + qty retur
4. Submit → approval (jika aktif)
5. **Confirm** retur → stok **berkurang**

Status

draft → submitted → approved → confirmed / rejected / cancelled

English

Menu: Procurement → Purchase Return

Enable: Settings → Return enabled

When to use?

- Damaged goods / wrong delivery
- Return to supplier after GR

Steps

1. Create **Purchase Return**
2. Reference **confirmed GR** or **PO**
3. Select lines + return qty
4. Submit → approval (if enabled)
5. **Confirm** return → stock **decreases**

Status

draft → submitted → approved → confirmed / rejected / cancelled

15. Nota Debit / Kredit Supplier / Supplier Debit / Credit Notes

Bahasa Indonesia

Menu: Pengadaan → Debit/Credit Note

Aktifkan: Settings → Vendor adjustment enabled

Kapan dipakai?

- Supplier kurang kirim → **credit note** (kredit hutang)
- Supplier charge extra → **debit note**
- Koreksi harga setelah GR tanpa retur fisik

Langkah

1. Buat nota, pilih supplier
 2. Link ke GR / Invoice (opsional)
 3. Isi baris koreksi (+/- amount)
 4. Confirm → adjust hutang / match
-

English

Menu: Procurement → Debit/Credit Note

Enable: Settings → Vendor adjustment enabled

When to use?

- Supplier under-delivered → **credit note** (credit payables)
- Supplier charged extra → **debit note**
- Price correction after GR without physical return

Steps

1. Create note, select supplier
 2. Link to GR / Invoice (optional)
 3. Fill correction lines (+/- amount)
 4. Confirm → adjust payables / match
-

16. Jadwal Pengiriman (Delivery Schedule) / Delivery Schedule

Bahasa Indonesia

Menu: Pengadaan → Delivery Schedule

Syarat: Delivery enabled + flow PO

Fungsi

- Jadwalkan **tanggal kirim** per PO atau per baris
- Dashboard alert **delivery overdue**
- Gudang tahu kapan harus siap terima

Langkah

1. Dari detail PO → panel **Delivery Schedule**, atau
 2. Menu Delivery Schedule → buat jadwal linked ke PO
 3. Isi expected date, qty, catatan
 4. Update status saat barang datang / terlambat
-

English

Menu: Procurement → Delivery Schedule

Requirement: Delivery enabled + PO flow

Function

- Schedule **delivery date** per PO or per line
- Dashboard **delivery overdue** alert
- Warehouse knows when to prepare for receipt

Steps

1. From PO detail → **Delivery Schedule** panel, or
 2. Delivery Schedule menu → create schedule linked to PO
 3. Fill expected date, qty, notes
 4. Update status when goods arrive / are late
-

17. Tagihan Supplier (Vendor Invoice / AP) / Vendor Invoice (Vendor Invoice / AP)

Bahasa Indonesia

Menu: Pengadaan → Vendor Invoice

Aktifkan: Settings → Vendor invoice enabled

17.1 Alur AP

PO + GR → Supplier kirim invoice → Input AP → Match → Approve → Payment

17.2 Cara input invoice

Cara	Keterangan
Manual	Buat invoice, pilih supplier, isi baris
Dari PO/GR	Pull qty & harga referensi
Vendor portal	Supplier upload PDF sendiri

17.3 Langkah manual

1. + **Buat Vendor Invoice**
2. Pilih supplier
3. Isi: nomor faktur supplier, tanggal, jatuh tempo
4. Baris: produk/jasa, qty, harga, PPN
5. Link ke PO / GR (untuk 3-way match)
6. Lampiran scan faktur
7. Submit → approval (jika aktif)

17.4 Status invoice

Status	Arti
draft	Draft
submitted	Menunggu approval
approved	Disetujui, siap match/bayar
matched	Sudah match dengan PO/GR
partially_paid	Sebagian sudah dibayar
paid	Lunas
rejected / cancelled	Ditolak / batal

English

Menu: Procurement → Vendor Invoice

Enable: Settings → Vendor invoice enabled

17.1 AP flow

PO + GR → Supplier sends invoice → Input AP → Match → Approve → Payment

17.2 How to input invoice

Method	Notes
Manual	Create invoice, select supplier, fill lines
From PO/GR	Pull qty & price reference
Vendor portal	Supplier uploads PDF themselves

17.3 Manual steps

1. + **Create Vendor Invoice**

2. Select supplier
3. Fill in: supplier invoice number, date, due date
4. Lines: product/service, qty, price, VAT
5. Link to PO / GR (for 3-way match)
6. Attach scanned invoice
7. Submit → approval (if enabled)

17.4 Invoice status

Status	Meaning
draft	Draft
submitted	Waiting for approval
approved	Approved, ready for match/payment
matched	Already matched with PO/GR
partially_paid	Partially paid
paid	Fully paid
rejected / cancelled	Rejected / cancelled

18. 3-Way Match & Match Exception / 3-Way Match & Match Exception

Bahasa Indonesia

Menu: Pengadaan → Match Exceptions

Aktifkan: Settings → 3-way match (atau 2-way)

Apa itu 3-way match?

Sistem membandingkan **tiga sumber**:

Sumber	Data
PO	Qty & harga pesanan
GR	Qty diterima
Invoice	Qty & harga ditagih

Jika selisih melebihi **toleransi** (setting), muncul **Match Exception**.

2-way match

Untuk **jasa / non-stock** — bandingkan PO ↔ Invoice saja (tanpa GR).

Menyelesaikan exception

1. Buka **Match Exceptions**
2. Review selisih qty/harga
3. Tindakan:
 - Koreksi invoice
 - Buat debit/credit note
 - Override dengan otorisasi (jika diizinkan)
4. Mark **resolved**

English

Menu: Procurement → Match Exceptions

Enable: Settings → 3-way match (or 2-way)

What is 3-way match?

The system compares **three sources**:

Source	Data
PO	Ordered qty & price
GR	Qty received
Invoice	Qty & price billed

If the variance exceeds **tolerance** (setting), a **Match Exception** appears.

2-way match

For **services / non-stock** — compare PO ↔ Invoice only (without GR).

Resolving exceptions

1. Open **Match Exceptions**
2. Review qty/price variance
3. Actions:
 - Correct invoice
 - Create debit/credit note
 - Override with authorization (if allowed)
4. Mark **resolved**

19. Batch Pembayaran Supplier / Supplier Payment Batch

Bahasa Indonesia

Menu: Pengadaan → Payment Batch

Aktifkan: Settings → Payment batch enabled

Langkah

1. + **Buat Payment Batch**
2. Pilih invoice yang akan dibayar (multi invoice, 1 supplier atau campur)
3. Isi metode bayar (transfer/kas)
4. Submit → approval (jika aktif)
5. **Pay / Confirm** → invoice status `paid` , GL jurnal (jika aktif)

Manfaat

- Satu kali transfer untuk banyak invoice
- Audit trail pembayaran
- Integrasi cash/bank account

English

Menu: Procurement → Payment Batch

Enable: Settings → Payment batch enabled

Steps

1. + **Create Payment Batch**

2. Select invoices to pay (multiple invoices, one supplier or mixed)
3. Fill payment method (transfer/cash)
4. Submit → approval (if enabled)
5. **Pay / Confirm** → invoice status **paid** , GL journal (if enabled)

Benefits

- One transfer for many invoices
- Payment audit trail
- Cash/bank account integration

20. Uang Muka Supplier (Prepayment) / Supplier Prepayment

Bahasa Indonesia

Menu: Pengadaan → Prepayment

Aktifkan: Settings → Prepayment enabled

Kapan dipakai?

- DP sebelum barang dikirim
- Kontrak dengan termin uang muka

Langkah

1. Buat **Prepayment** — supplier, amount, referensi PO (opsional)
2. Approval → **Pay**
3. Saat invoice datang, prepayment **dikurangkan** (knock-off)

English

Menu: Procurement → Prepayment

Enable: Settings → Prepayment enabled

When to use?

- Down payment before goods are shipped
- Contract with advance payment terms

Steps

1. Create **Prepayment** — supplier, amount, PO reference (optional)
2. Approval → **Pay**
3. When invoice arrives, prepayment is **deducted** (knock-off)

21. PPh / Withholding Tax / Withholding Tax (PPh)

Bahasa Indonesia

Menu: Pengadaan → Withholding Tax

Aktifkan: Settings → Withholding tax enabled

Fungsi

- Aturan PPh 23 / PPh 22 / PPh 4(2) per supplier atau jenis transaksi
- Saat payment batch, sistem hitung **PPh potong**
- Generate bukti potong / hutang PPh ke akun GL

Setup

1. Definisikan **tax rules** — jenis, rate, base amount
2. Assign ke supplier atau kategori

3. Saat bayar invoice, PPh otomatis terpotong

English

Menu: Procurement → Withholding Tax

Enable: Settings → Withholding tax enabled

Function

- PPh 23 / PPh 22 / PPh 4(2) rules per supplier or transaction type
- On payment batch, system calculates **withheld tax**
- Generate withholding certificate / withholding tax payable to GL account

Setup

1. Define **tax rules** — type, rate, base amount
 2. Assign to supplier or category
 3. When paying invoice, tax is automatically withheld
-

22. Jurnal GL Otomatis / Automatic GL Journals

Bahasa Indonesia

Menu: Pengadaan → GL Journals

Aktifkan: Settings → GL posting enabled + mapping COA diisi

Jurnal otomatis dibuat saat:

Event	Jurnal tipikal
GR confirmed (stok)	Dr Persediaan / Cr GRNI
Invoice approved	Dr GRNI / Dr PPN / Cr Hutang
Payment	Dr Hutang / Cr Bank
Prepayment	Dr Uang Muka / Cr Bank
Fixed asset GR	Dr Aset Tetap / Cr Hutang
Expense item GR	Dr Beban / Cr Hutang

User finance bisa review jurnal di menu **GL Journals** — biasanya read-only (auto-generated).

English

Menu: Procurement → GL Journals

Enable: Settings → GL posting enabled + COA mapping filled in

Automatic journals created on:

Event	Typical journal
GR confirmed (stock)	Dr Inventory / Cr GRNI
Invoice approved	Dr GRNI / Dr VAT / Cr Payables
Payment	Dr Payables / Cr Bank
Prepayment	Dr Prepayment / Cr Bank
Fixed asset GR	Dr Fixed Asset / Cr Payables

Expense item GR	Dr Expense / Cr Payables
-----------------	--------------------------

Finance users can review journals in the **GL Journals** menu — usually read-only (auto-generated).

23. Anggaran (Budget) / Budget

Bahasa Indonesia

Menu: Pengadaan → Budget

Aktifkan: Settings → Budget check enabled

23.1 Setup budget

1. + **Buat Budget**
2. Isi: nama, tahun fiskal, periode mulai-selesai
3. Tambah **baris per departemen**:
 - Dept A: Rp 100.000.000
 - Dept B: Rp 50.000.000
4. **Activate** budget

23.2 Mekanisme

Konsep	Arti
Allocated	Total anggaran
Committed	Sudah di-PO/PR approved (komitmen)
Available	Sisa = Allocated - Committed - Actual
Actual	Realisasi dari GR

23.3 Budget check

Saat **submit PR/PO**, jika total melebihi **available** budget dept → sistem **menolak** submit (jika check aktif).

English

Menu: Procurement → Budget

Enable: Settings → Budget check enabled

23.1 Budget setup

1. + **Create Budget**
2. Fill in: name, fiscal year, start-end period
3. Add **lines per department**:
 - Dept A: Rp 100,000,000
 - Dept B: Rp 50,000,000
4. **Activate** budget

23.2 Mechanism

Concept	Meaning
Allocated	Total budget
Committed	Already on approved PO/PR (commitment)
Available	Remaining = Allocated - Committed - Actual

Actual	Realization from GR
---------------	---------------------

23.3 Budget check

On **PR/PO submit**, if total exceeds department **available** budget → system **rejects** submit (if check enabled).

24. Aset Tetap dari Pembelian / Fixed Assets from Purchases

Bahasa Indonesia

Menu: Pengadaan → Fixed Assets

Alur

1. Produk di Master → centang **Item aset tetap**
2. Buat PO → GR seperti biasa
3. Saat GR **Confirm** → sistem buat **kartu aset** per unit
4. Field aset: nomor aset, serial, lokasi, custodian, nilai perolehan

Manfaat

- Laptop/meja/mesin tidak masuk stok gudang
- Langsung register di register aset perusahaan
- GL: Dr Aset Tetap (bukan persediaan)

English

Menu: Procurement → Fixed Assets

Flow

1. Product in Master → check **Fixed asset item**
2. Create PO → GR as usual
3. On GR **Confirm** → system creates **asset card** per unit
4. Asset fields: asset number, serial, location, custodian, acquisition value

Benefits

- Laptop/desk/machine does not enter warehouse stock
- Directly registered in company asset register
- GL: Dr Fixed Asset (not inventory)

25. Approval — Manual, Matrix, Delegasi / Approval — Manual, Matrix, Delegation

Bahasa Indonesia

25.1 Approval Manual (default)

Saat **Submit** PR/PO/Retur/Invoice:

1. Form menampilkan field **Approver**
2. Pilih user approver — urutan = level (1, 2, 3...)
3. Approver dapat notifikasi → buka app **Approvals**
4. Approve / Reject sequential (level 2 menunggu level 1 selesai)

Kecuali Parallel approval aktif → semua approver satu level harus approve.

25.2 Approval Matrix

Menu: Pengadaan → Approval Matrix

Setting: Mode approval = **Matrix**

Definisikan aturan otomatis:

Field	Contoh
Doc type	PR / PO
Departemen	Finance / IT / All
Min amount	Rp 0
Max amount	Rp 10.000.000
Level	1, 2, 3
Approver type	User / Role / Position / Job Level
Approver ref	Nama user atau role
Escalate after X days	3 hari → eskalasi ke direktur

Saat submit, sistem **resolve approver otomatis** — user tidak perlu pilih manual.

25.3 Approval Delegation

Menu: Pengadaan → Approval Delegation

Jika approver cuti:

1. Buat delegasi: **From user** → **To user**
2. Periode tanggal mulai-selesai
3. Semua approval yang masuk ke From user di-forward ke To user

25.4 Segregation of Duties (SoD)

Aturan	Efek
Creator ≠ Approver	Pembuat dokumen tidak bisa approve sendiri
Approver ≠ Receiver	Approver PO tidak bisa confirm GR (opsional)

25.5 Escalation / SLA

Jika approval pending > **SLA days** → eskalasi ke user yang ditentukan di matrix.

English

25.1 Manual Approval (default)

When **Submit** PR/PO/Return/Invoice:

1. Form displays **Approver** field
2. Select approver user — order = level (1, 2, 3...)
3. Approver receives notification → open **Approvals** app
4. Approve / Reject sequentially (level 2 waits for level 1 to finish)

Unless Parallel approval is enabled → all approvers at one level must approve.

25.2 Approval Matrix

Menu: Procurement → Approval Matrix

Setting: Approval mode = **Matrix**

Define automatic rules:

Field	Example
Doc type	PR / PO
Department	Finance / IT / All
Min amount	Rp 0
Max amount	Rp 10,000,000
Level	1, 2, 3
Approver type	User / Role / Position / Job Level
Approver ref	User name or role
Escalate after X days	3 days → escalate to director

On submit, system **resolves approver automatically** — user does not need to select manually.

25.3 Approval Delegation

Menu: Procurement → Approval Delegation

If approver is on leave:

1. Create delegation: **From user** → **To user**
2. Start-end date period
3. All approvals to From user are forwarded to To user

25.4 Segregation of Duties (SoD)

Rule	Effect
Creator ≠ Approver	Document creator cannot approve their own document
Approver ≠ Receiver	PO approver cannot confirm GR (optional)

25.5 Escalation / SLA

If approval pending > **SLA days** → escalate to user defined in matrix.

26. Manajemen Vendor / Vendor Management

Bahasa Indonesia

Selain master supplier, fitur vendor management mencakup:

26.1 Onboarding

- Supplier baru status **Pending**
- Upload dokumen legal
- Admin **Approve** → supplier bisa dipakai di PO

26.2 Vendor Evaluation

Score otomatis dari histori:

- **On-time delivery** — PO vs GR date
- **Quality** — retur / rejection rate
- **Price variance** — PO vs invoice

26.3 Tier & Status

Tier	Arti
Strategic	Supplier kunci
Preferred	Supplier favorit
One-time	Sekali pakai

Status	Efek
Active	Normal
Suspended	Tidak bisa PO baru
Blacklisted	Diblokir permanen

26.4 Compliance Alert

Dashboard menampilkan dokumen supplier (SIUP, NPWP, PKP) yang akan/sudah expired.

English

In addition to supplier master data, vendor management features include:

26.1 Onboarding

- New supplier status **Pending**
- Upload legal documents
- Admin **Approve** → supplier can be used on PO

26.2 Vendor Evaluation

Automatic score from history:

- **On-time delivery** — PO vs GR date
- **Quality** — return / rejection rate
- **Price variance** — PO vs invoice

26.3 Tier & Status

Tier	Meaning
Strategic	Key supplier
Preferred	Preferred supplier
One-time	One-time use

Status	Effect
Active	Normal
Suspended	Cannot create new PO
Blacklisted	Permanently blocked

26.4 Compliance Alert

Dashboard shows supplier documents (SIUP, NPWP, PKP) that are **about to expire / already expired**.

27. Portal Vendor (Supplier) / Vendor Portal (Supplier)

Bahasa Indonesia

Akses

Supplier menerima **link portal** unik (token) dari perusahaan Anda:

```
https://[domain-keaone]/vendor-portal/[token]
```

Token di-generate dari detail supplier di Master.

Fitur portal (untuk supplier)

Fitur	Keterangan
Lihat PO	Daftar PO aktif
Konfirmasi PO	Tandai sudah terima order
Upload invoice	Kirim PDF faktur → jadi Vendor Invoice submitted

Langkah admin mengaktifkan portal

1. Buka supplier di Master
2. Generate / copy **Portal link**
3. Kirim ke supplier via email/WhatsApp
4. Pastikan **Vendor invoice enabled** agar supplier bisa upload faktur

English

Access

Supplier receives a unique **portal link** (token) from your company:

```
https://[keaone-domain]/vendor-portal/[token]
```

Token is generated from supplier detail in Master.

Portal features (for supplier)

Feature	Notes
View PO	List of active POs
Confirm PO	Mark order as received
Upload invoice	Send invoice PDF → becomes Vendor Invoice submitted

Admin steps to enable portal

1. Open supplier in Master
2. Generate / copy **Portal link**
3. Send to supplier via email/WhatsApp
4. Ensure **Vendor invoice enabled** so supplier can upload invoice

28. Laporan & Analitik / Reports & Analytics

Bahasa Indonesia

Menu: Pengadaan → Reports

28.1 Jenis laporan

Laporan	Isi	Filter
Spend Analysis	Belanja per supplier/kategori/dept + trend bulanan	Tanggal, group by
Cycle Time	Rata-rata hari PR→PO→GR→Invoice	Tanggal
Vendor Performance	On-time %, quality score, price variance	Tanggal
Budget vs Actual	Alokasi vs komitmen vs realisasi	Tanggal
Open PO Aging	PO open bucket 0-30 / 31-60 / 61+ hari	Snapshot (tanpa date range)
Price Variance	Selisih harga PO vs GR vs Invoice	Tanggal
ABC Analysis	Top supplier/produk klasifikasi A/B/C	Tanggal, group supplier/product

28.2 Cara pakai

1. Pilih **tab laporan**
2. Set **tanggal dari – sampai** (atau preset Hari ini / Bulan ini)
3. Pilih **Group by** (untuk Spend & ABC)
4. Data refresh otomatis

28.3 Tips interpretasi

- **Open PO Aging tinggi** → supplier sering telat atau gudang belum GR
- **Cycle time panjang** → bottleneck di approval atau purchasing
- **Price variance** → negosiasi ulang atau supplier price list perlu update
- **ABC** → fokuskan negosiasi ke supplier/produk klasifikasi A (80% spend)

English

Menu: Procurement → Reports

28.1 Report types

Report	Content	Filters
Spend Analysis	Spend per supplier/category/dept + monthly trend	Date, group by
Cycle Time	Average days PR→PO→GR→Invoice	Date
Vendor Performance	On-time %, quality score, price variance	Date
Budget vs Actual	Allocation vs commitment vs actual	Date
Open PO Aging	Open PO buckets 0-30 / 31-60 / 61+ days	Snapshot (no date range)
Price Variance	Price variance PO vs GR vs Invoice	Date
ABC Analysis	Top supplier/product A/B/C classification	Date, group supplier/product

28.2 How to use

1. Select **report tab**
2. Set **date from – to** (or preset Today / This Month)
3. Select **Group by** (for Spend & ABC)
4. Data refreshes automatically

28.3 Interpretation tips

- **High Open PO Aging** → supplier often late or warehouse has not GR yet
 - **Long cycle time** → bottleneck in approval or purchasing
 - **Price variance** → renegotiate or supplier price list needs update
 - **ABC** → focus negotiation on classification A suppliers/products (80% spend)
-

29. Fitur Pendukung Lainnya / Other Supporting Features

Bahasa Indonesia

29.1 Lampiran (Attachments)

- Upload file ke PR, PO, GR, Invoice
- Format: PDF, gambar, dokumen
- Aktifkan/nonaktifkan di Settings

29.2 Barcode Scanner

- Di form GR/Direct → scan barcode produk
- Mempercepat penerimaan barang

29.3 Quick Add Bar

- Tambah produk/supplier cepat dari form PO tanpa keluar halaman

29.4 Share & PDF

Semua dokumen PR/PO mendukung:

- Cetak PDF
- Share WhatsApp
- Public link read-only

29.5 Activity Log

Semua aksi tercatat di **Activity Log** (modul global):

- Siapa buat/edit/approve
- Perubahan field (jika field audit aktif)

29.6 Notifikasi

Approver menerima notifikasi saat ada dokumen **submitted** menunggu tindakan.

English

29.1 Attachments

- Upload files to PR, PO, GR, Invoice
- Formats: PDF, image, documents
- Enable/disable in Settings

29.2 Barcode Scanner

- On GR/Direct form → scan product barcode
- Speeds up goods receipt

29.3 Quick Add Bar

- Quickly add product/supplier from PO form without leaving the page

29.4 Share & PDF

All PR/PO documents support:

- Print PDF

- Share WhatsApp
- Public read-only link

29.5 Activity Log

All actions are recorded in **Activity Log** (global module):

- Who created/edited/approved
- Field changes (if field audit enabled)

29.6 Notifications

Approvers receive notifications when a document is **submitted** and waiting for action.

30. Peran User & Contoh Skenario Harian / User Roles & Daily Scenario Examples

Bahasa Indonesia

30.1 Peran tipikal

Peran	Menu utama	Tugas
Staff dept	PR	Ajukan kebutuhan barang
Dept head	PR approval, Budget	Setujui PR dept
Purchasing	PO, RFQ, Supplier	Order ke supplier, negosiasi
Gudang	GR, Return, Delivery	Terima barang, catat qty
Finance/AP	Invoice, Match, Payment	Proses tagihan & bayar
Manager/Director	Approval, Reports	Oversight & analytics
Admin	Settings, Matrix, Roles	Konfigurasi modul

30.2 Skenario: Beli bahan baku resto (PO → GR)

1. **07:00** — Purchasing buat PO ke supplier sayur (50 kg tomat)
2. **07:05** — Manager approve PO via app Approvals
3. **07:10** — Purchasing klik **Order**, kirim PDF via WhatsApp
4. **14:00** — Barang datang, gudang buat GR 50 kg → Confirm
5. **14:01** — Stok tomat +50 kg, cost price update
6. **Senin** — Supplier kirim faktur, AP input Vendor Invoice
7. **Selasa** — 3-way match OK → Payment batch → transfer

30.3 Skenario: Laptop IT (PR → PO → GR → Aset)

1. IT buat PR 3 laptop
2. IT Manager approve
3. Purchasing PO ke supplier IT
4. Setelah approve → Order
5. Gudang/IT terima → GR Confirm
6. Sistem buat 3 **kartu aset** otomatis
7. Finance review jurnal Dr Aset Tetap

30.4 Skenario: ATK via Direct Receipt

1. Admin beli ATK langsung di toko
2. Buka Direct Receipt, pilih supplier toko ATK
3. Pilih produk procurement (non-inventory)
4. Confirm → tidak masuk stok, tercatat expense

30.1 Typical roles

Role	Main menus	Tasks
Department staff	PR	Submit goods requirements
Department head	PR approval, Budget	Approve department PR
Purchasing	PO, RFQ, Supplier	Order to supplier, negotiate
Warehouse	GR, Return, Delivery	Receive goods, record qty
Finance/AP	Invoice, Match, Payment	Process invoices & payment
Manager/Director	Approval, Reports	Oversight & analytics
Admin	Settings, Matrix, Roles	Module configuration

30.2 Scenario: Buy restaurant raw materials (PO → GR)

1. **07:00** — Purchasing creates PO to vegetable supplier (50 kg tomatoes)
2. **07:05** — Manager approves PO via Approvals app
3. **07:10** — Purchasing clicks **Order**, sends PDF via WhatsApp
4. **14:00** — Goods arrive, warehouse creates GR 50 kg → Confirm
5. **14:01** — Tomato stock +50 kg, cost price updated
6. **Monday** — Supplier sends invoice, AP inputs Vendor Invoice
7. **Tuesday** — 3-way match OK → Payment batch → transfer

30.3 Scenario: IT laptop (PR → PO → GR → Asset)

1. IT creates PR for 3 laptops
2. IT Manager approves
3. Purchasing PO to IT supplier
4. After approve → Order
5. Warehouse/IT receives → GR Confirm
6. System creates 3 **asset cards** automatically
7. Finance reviews journal Dr Fixed Asset

30.4 Scenario: Office supplies via Direct Receipt

1. Admin buys office supplies directly at store
2. Open Direct Receipt, select office supply store supplier
3. Select procurement product (non-inventory)
4. Confirm → does not enter stock, recorded as expense

31. FAQ & Troubleshooting / FAQ & Troubleshooting

Bahasa Indonesia

Q: Menu PR tidak muncul?

A: Cek **Settings** → **Purchase Flow**. PR hanya muncul jika flow = **Strict PR** → **PO** → **GR**.

Q: Tidak bisa pilih supplier di PO?

A: Supplier mungkin **suspended**, **blacklisted**, atau **onboarding pending**. Cek status di Master → Supplier.

Q: Submit PR/PO ditolak "budget exceeded"?

A: Budget check aktif dan dept sudah kehabisan anggaran. Minta admin tambah budget atau kurangi qty.

Q: GR Confirm tapi stok tidak bertambah?

A: Produk mungkin **procurement item** atau **fixed asset** (sengaja tidak track stock). Cek flag produk di Master.

Q: Approver tidak muncul di dropdown?

A: Pastikan user aktif & punya akses. Mode **matrix** → approver otomatis, tidak perlu pilih manual.

Q: Match exception terus muncul?

A: Cek toleransi qty/harga di Settings. Pastikan invoice qty/harga sesuai PO/GR atau buat adjustment note.

Q: Vendor portal link invalid?

A: Token expired atau supplier di-suspend. Regenerate token dari Master supplier.

Q: Laporan Reports kosong?

A: Pastikan ada GR confirmed / PO dalam rentang tanggal. Cek hak akses menu `procurementreports` .

Q: Jurnal GL tidak terbentuk?

A: GL posting harus aktif **dan** semua akun COA mapping sudah diisi di Settings.

English

Q: PR menu does not appear?

A: Check **Settings** → **Purchase Flow**. PR only appears if flow = **Strict PR** → **PO** → **GR**.

Q: Cannot select supplier on PO?

A: Supplier may be **suspended**, **blacklisted**, or **onboarding pending**. Check status in Master → Supplier.

Q: PR/PO submit rejected "budget exceeded"?

A: Budget check is active and department has run out of budget. Ask admin to add budget or reduce qty.

Q: GR Confirm but stock does not increase?

A: Product may be **procurement item** or **fixed asset** (intentionally does not track stock). Check product flags in Master.

Q: Approver does not appear in dropdown?

A: Ensure user is active & has access. **Matrix** mode → approver automatic, no manual selection needed.

Q: Match exception keeps appearing?

A: Check qty/price tolerance in Settings. Ensure invoice qty/price matches PO/GR or create adjustment note.

Q: Vendor portal link invalid?

A: Token expired or supplier suspended. Regenerate token from Master supplier.

Q: Reports empty?

A: Ensure there is confirmed GR / PO within date range. Check menu access permission `procurementreports` .

Q: GL journal not created?

A: GL posting must be active **and** all COA mapping must be filled in Settings.

32. Glosarium / Glossary

Bahasa Indonesia

Istilah	Definisi
AP	Accounts Payable — hutang ke supplier
Approval Matrix	Aturan approver otomatis berdasarkan amount/dept
Blanket PO	Kontrak PO tahunan dengan release berkala
Commitment	Anggaran terpakai untuk PO/PR approved
Cost Center	Pusat biaya, biasanya = departemen
Direct Receipt	Penerimaan tanpa PO
GR	Goods Receipt — bukti terima barang
GRNI	Goods Received Not Invoiced — akun perantara
Landed Cost	Biaya tambahan (freight, bea) dialokasikan ke item
Match Exception	Selisih PO/GR/Invoice yang perlu diselesaikan
Partial Receive	Terima barang sebagian dari PO
PO	Purchase Order — pesanan ke supplier
PR	Purchase Requisition — permintaan internal
PRN	Purchase Return — retur ke supplier
RFQ	Request for Quotation — minta penawaran
SoD	Segregation of Duties — pemisahan peran
3-Way Match	Pencocokan PO + GR + Invoice
2-Way Match	Pencocokan PO + Invoice
Vendor Portal	Halaman supplier untuk lihat PO & upload invoice

English

Term	Definition
AP	Accounts Payable — payables to supplier
Approval Matrix	Automatic approver rules based on amount/department
Blanket PO	Annual PO contract with periodic releases
Commitment	Budget used for approved PO/PR
Cost Center	Cost center, usually = department
Direct Receipt	Receipt without PO
GR	Goods Receipt — proof of goods received
GRNI	Goods Received Not Invoiced — interim account

Landed Cost	Additional costs (freight, customs) allocated to items
Match Exception	PO/GR/Invoice variance that must be resolved
Partial Receive	Receive partial goods from PO
PO	Purchase Order — order to supplier
PR	Purchase Requisition — internal request
PRN	Purchase Return — return to supplier
RFQ	Request for Quotation — request for quotation
SoD	Segregation of Duties — role separation
3-Way Match	Matching PO + GR + Invoice
2-Way Match	Matching PO + Invoice
Vendor Portal	Supplier page to view PO & upload invoice

Lampiran: Checklist Go-Live Procurement / Appendix: Procurement Go-Live Checklist

Bahasa Indonesia

Gunakan checklist ini saat pertama kali deploy modul ke perusahaan client:

- ☐ Modul Pengadaan aktif di tenant
- ☐ Role & permission diset per user
- ☐ Master: produk, supplier, gudang, dept
- ☐ Settings: pilih flow (direct / PO→GR / strict)
- ☐ Settings: toggle fitur sesuai kebutuhan client
- ☐ Jika AP: aktifkan invoice, match, payment + COA mapping
- ☐ Jika approval: tentukan manual vs matrix
- ☐ Jika matrix: isi Approval Matrix rules
- ☐ Test 1 siklus penuh: PO → GR → Invoice → Payment
- ☐ Training user per role (dept, purchasing, gudang, finance)
- ☐ Bagikan link tutorial ini ke tim client

Dokumen ini menjelaskan fitur modul Pengadaan KEA One per Agustus 2026. Jika ada perbedaan dengan tampilan di environment Anda, kemungkinan ada fitur yang belum diaktifkan di Settings atau hak role belum diberikan.

Pertanyaan atau permintaan training tambahan? Hubungi admin KEA One / tim implementasi.

English

Use this checklist when first deploying the module to a client company:

- ☐ Procurement module active in tenant
- ☐ Roles & permissions set per user
- ☐ Master: products, suppliers, warehouses, departments
- ☐ Settings: choose flow (direct / PO→GR / strict)
- ☐ Settings: toggle features according to client needs
- ☐ If AP: enable invoice, match, payment + COA mapping
- ☐ If approval: decide manual vs matrix
- ☐ If matrix: fill Approval Matrix rules

- ☐ Test 1 full cycle: PO → GR → Invoice → Payment
- ☐ User training per role (department, purchasing, warehouse, finance)
- ☐ Share this tutorial link with client team

This document describes KEA One Procurement module features as of August 2026. If there are differences from what you see in your environment, some features may not be enabled in Settings or role permissions may not have been granted yet.

Questions or additional training requests? Contact KEA One admin / implementation team.
